Short summary

Prof dr Petra Denig is professor of Drug Utilization Quality at the University of Groningen in The Netherlands. She leads a research group at the Clinical Pharmacy and Pharmacology Department, University Medical Center Groningen. She is also program leader of the Real world studies in PharmacoEpidemiology, -Genetics, -Economics, & -Therapy (PEGET) program at the University of Groningen. Major research aims are developing innovative strategies and insights that contribute to optimal and personalized use of medicines in practice. The focus is on chronic and complex diseases, particularly cardiovascular diseases and diabetes. Prof Denig and her co-workers have published more than 150 peer-reviewed papers and book chapters about prescribing behavior, drug preferences, medication adherence, educational interventions, and treatment outcomes in real-world settings.

Furthermore, Prof Denig is leader of the Groningen Initiative to Analyse Type 2 diabetes Treatment (GIANTT), which is a joint initiative of health care providers and researchers to improve the quality of care for patients with diabetes. GIANTT initiates and facilitates scientific research to assess determinants of quality of care, to evaluate initiatives for improving the quality of care, and the impact of care on patient outcomes in the primary care setting. Prof Denig and her co-workers have developed and evaluated educational modules and feedback material for practitioners and patients, also focusing on shared-decision making.

Prof Denig is member of several national expert groups, including the Working Group Prescription Feedback of the Dutch Institute for Rational Use of Medicine and the Working Group Deprescribing for the national Multidisciplinary Guideline Polypharmacy in the Elderly. She is also member of the Network of European Researchers in Deprescribing (NERD) steering committee.
