

Ms Emma Dunlop (she/her)

Research Associate

Work address: Strathclyde Institute of Pharmacy & Biomedical Science,
161 Cathedral Street, Glasgow, G4 ORE

PRESENT EMPLOYMENT(S)

2016 – present: Research Associate, Strathclyde Institute of Pharmacy & Biomedical Science, University of Strathclyde, Glasgow

EDUCATION / PROFESSIONAL QUALIFICATIONS

2020-2023: Postgraduate Certificate in Knowledge Exchange, University of Strathclyde, Glasgow

2015-present: PhD, SIPBS, University of Strathclyde, Glasgow

2009: BA (Hons) Psychology (2:1), University of Strathclyde, Glasgow

PREVIOUS EMPLOYMENTS

2010–2016: Research Assistant, University of Strathclyde Institute of Pharmacy & Biomedical Science

2013-2017: Faculty Education Liaison Advisor, University of Strathclyde

2010-2011: Mental Health Support Worker, Positive Mental Attitudes (PMA) Arts for Mental Health Group, NHS Greater Glasgow & Clyde

RELEVANT RESEARCH EXPERTISE

My role as a Researcher in SIPBS has focused on qualitative research methodologies (study design, data collection, analysis and presentation of results) used to explore health services, mostly in the pharmacy and medicines context. My research activity has involved the following:

- Exploration of the collection, utilisation and routine implementation of Patient Reported Outcome Measures (PROMs) in cancer patients
- Patient, citizen and clinician-led design of digital technologies (including cancer PROMs and mental health digital needs)
- Qualitative exploration of the social care data sociotechnical system
- Robotic distribution of medicines in secondary health care, and robotics and automation in community pharmacy
- Pharmaceutical palliative care in the community
- Medicines review process and use of Clinical Experts by the Scottish Medicines Consortium
- Patient safety and safety culture in community pharmacy
- Patient & public involvement
- Public engagement

My research is usually multidisciplinary, involving collaborative working with colleagues from the health sector, third sectors, Government and beyond. I am the co-chair of the Scottish Cancer Patient Reported Outcome Measures (PROMs) Advisory Group set up via the Cancer Medicines Outcome programme (CMOP), which reports to Scottish Government. The SC PROMs AG aims to work towards a more cohesive “once for Scotland” approach to PROMs. I also formally supervise PhD students and provide informal support and mentoring of staff and students, including some teaching.
