SHORT BIO

Genc Alimehmeti is Associate Professor at the Department of Management, University of Tirana and Research Fellow at the Department of Management, University of Bologna. He has lectured on topics such as Managerial and Financial Accounting, Planning and Control Systems, Sustainable Development, Corporate Governance and Management at the University of Bologna, University of Tirana, Fondazione Alma Mater, Open University Italy (IUL), Bologna Business School, University of Malta, Lady of Good Council – Vatican. Dr Alimehmeti received his Ph.D. in 2012 at the University ‘G. d’Annunzio’, Italy with a quantitative thesis on Corporate Governance, Financial and Internal Control Systems.

Dr Alimehmeti advises the University of Bologna for the Development and Implementation of the Sustainable Development Goals, as well as planning and control systems; and the Emilia Romagna Region in Italy on the Strategies for the Sustainable Development of the Companies within its area, the funding schemes that foster environmental protection, and sustainable strategies. He is leading for Horizon2020 Bio Plastics Europe the Sustainable Business Models for Green Value Chain Creation in Europe, while coordinating actions with different stakeholders for life cycle and financial assessment for circular economies in bio-plastics. He is part of the working group of the consortium for Sustainable Strategy for Plastic packaging management through artificial Intelligence for Circular Economy (SURPRICE), aiming in offering the possibility to provide new solutions to the development of intelligent systems able to support the design of a more effective processing of plastic packaging waste and to support the after-use systems capable of developing new economic models for plastic packaging lifecycle. He also provides consultancies to different private companies on the topics of planning and financial control and new business entry.

Another field of research and activities is related to Educational Management and Leadership, where he has several publications, research, and teaching experiences. He has more than ten years of experience in

working with schools at managerial and leadership level. He has participated in different research projects in Italy and abroad, working on school improvement and effectiveness and the principal's role. Recently he has organized three summer schools on school leadership in Albania and has led the School of Leadership reform in Albania working for AADF. At the moment, he is coordinating a project which is leading to public reform in Italy on the function of the school middle management. He holds a chair for Planning and Control for Schools at the Master of Educational Leadership in Bologna. He has different teaching experiences on such topics in Bologna and the University of Malta as well.

He has worked for many projects involving quantitative analysis and policy making, such as:

- Schools Middle Management, at the University of Bologna, in collaboration with six Italian regional school directorates

One of the objectives was to measure the accountability of the school system in Italy and use of data for decision making. A mixed methodology was applied, with the use of surveys, focus groups, interviews as well as open labs to understand and help schools in improving transparency of data and its communication with other stakeholders.

- Albania Debt Resolution – International Finance Corporation, World Bank Group, where he dealt with qualitative and quantitative analysis that led to the reform on bankruptcy in Albania. He worked as local consultant for four years, dealing with the economic aspects and procedures of the bankruptcy reform in Albania and has contributed to the Kosovo's reform as well.

- Comparative Study on Better Regulation in the Western Balkans for the Regional School of Public Administration - RESPA, where a set of KPIs were collected all Western Balkans countries on the regulatory impact assessment concluding with a gap analysis on the use of data in public policy.

The document is accessible on:

<https://www.respaweb.eu/download/doc/Better+Regulation+in+Western+Balkans.pdf/1a3f88428af462b3707500e452294bec.pdf>

- Better Regulation and Insolvency in Albania and Kosovo, for the International Finance Corporation. He has been involved for four years as a local consultant for the new insolvency regime in the Balkans, where he specifically focused on the use of data between courts, insolvency agency and other stakeholders.

Some of the last and ongoing projects are:

- Platform for “knowledge gain” in Albania

Director of the platform for ‘knowledge gain’, with the aim of selecting and promoting scientific research of diaspora in the topic of Circular Economy and Renewable Energy in Albania. The platform strives to use the knowledge produced in the best western universities and impact on policy making, stakeholders and public agencies in order to promote sustainable business models and the use of renewable energy solutions, as well as to push circular economy models in Albania in order to integrate with the European approach.

- School middle management

A three year project with six Italian regional school directorates in collaboration with the Department of Management, University of Bologna. The objective is to study the figure of the middle management at school and to influence mechanisms of promotion at policy level. A mixed methodology approach has been

applied: over 19.000 questionnaires have been collected from 600 schools; 50 focus groups; over 100 interviews. A multilevel equation modeling is being used for data analysis.

- **National Need Assessment of School Leadership in Albania (AADF).**

Leader of the National Need Assessment of School Leadership in Albania (AADF). The findings have enabled the constitution and program of the School of Directors in Albania.

- **Bio Plastics Europe (Horizon 2020 project - grant agreement No. 860407)**

Responsible for the development of green business models and in the bio-plastics sector. The tasks include the analysis of the bio-plastics sector, life cycle and financial assessment of bio-plastics new polymers, shifting from traditional business models to circular economy and cooperation models analysis for the supply chain and its financial impact.

- **The Innovative Use of Sustainable Business Models (Region of Emilia Romagna, Italy).**

The objective is to develop the sustainability strategies of the Emilia Romagna Region in providing financial incentives for new circular economies strategies in the area.

- **Sustainable strategy for Plastic Packaging Management through Artificial Intelligence for Circular Economy**

With the objective to scale up, improve and implement the adoption of reusable packaging and of compostable plastic packaging for targeted applications (garbage bags for organic waste and food packaging, food delivers etc). He is responsible for the life cycle and financial assessment of the new circular economy model.
